

DEADLINE REMINDER:

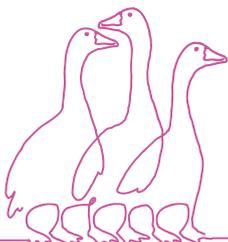

Energy Saving Opportunity Scheme Phase 2

Is the 5th December 2019 highlighted on your work's calendar as 'DEADLINE - Energy Saving Opportunity Scheme (ESOS) Phase 2'?

If not, it better be as time is running out for all large UK organisations outside of the public sector to ensure compliance with this mandatory energy assessment scheme.

The qualifying criteria includes companies:

- Who employ 250 employees or more, or
- Have a turnover in excess of 50 million Euros (approx. £39m) and an annual balance sheet in excess of 43 million Euros (approx. £34m), or
- Are part of a group of companies that fall into either of the above

For a large organisation with sub companies, the parent company is responsible for compliance.

Lessons learnt from Phase 1

In Phase 1 the Environment Agency undertook many audits of the ESOS submissions and found:

- Submission of poor levels of quality data regarding energy usage and consumption
- Late submissions resulting in a fine
- Submissions being non-compliant resulting in a fine

A fine for non-compliance can be as high as £50,000.

Three steps for ensuring compliance with Phase 2:

1. Collate data to enable reporting of your total energy consumption in the following sectors: buildings, transport and industrial processes (a minimum 12 month period of data is required)
2. Conduct ESOS audits to identify energy cost saving opportunities
3. Report compliance to your national scheme administrator

An alternative route is to achieve certification to ISO 50001: Energy Management.
